Contents at a glance

INTRODUCTION	
Chapter 1: Data communication and the OSI model	10
LAYER 1-2	
Chapter 2: Local networks.....	20
LAYER 3	
Chapter 3: Internet Protocol	32
Chapter 4: IP Routing	54
LAYER 4	
Chapter 5: The Transportation Layer	69
LAYER 5-7	
Chapter 6: E-mail, DNS and WWW.....	85
THEORY AND PRACTICE	
Chapter 7: Network design	102
Chapter 8: Network security	117
Chapter 9: Configuring network devices	134
APPENDIX	
Appendix A: Glossary	147
Appendix B: References	160

Table of contents

Contents at a glance.....	1
Table of contents	2
1 Data communication and the OSI model	7
1.1 Circuit-switched networks	7
1.2 Packet switching networks.....	9
1.3 PSTN	9
1.4 Last mile	10
1.5 Telestation	11
1.6 Access methods	11
1.7 Broadband.....	12
1.8 The OSI model.....	13
1.9 The seven different layers.....	14
Practice questions.....	16
2 Local area networks	17
2.1 Protocol Data Unit.....	17
2.2 Mac addresses	19
2.3 Types of frames.....	20
2.4 Unknown.....	22
2.5 Lifting	23
2.6 Switching.....	24
2.7 Mac tables.....	25
2.8 VLAN.....	27
Practice questions.....	28
3 Internet Protocol.....	29
3.1 Internet Protocol.....	29
3.2 IP addresses	30
3.3 Subnetting.....	31
3.4 IP protocol pdu format.....	32

3.5 Different layers in interaction	35
3.6 Ethernet and IP together	36
3.7 Router's handling of Ethernet/IP	37
3.8 Address Resolution Protocol	38
3.9 The Arp process	39
3.10 The package format for ARP	40
3.11 Arp issue in a local network	40
3.12 Arp response in a local network.....	42
3.13 Arp within larger networks and on the internet	43
3.14 Arp against a router	44
3.15 Arp from a router	47
3.16 IP version six (IPv6)	48
3.17 Neighbor Discovery Protocol	48
3.18 Traceroute.....	49
Practice questions.....	50
4 IP routing	51
4.1 IP addresses in depth	51
4.2 Netmask	52
4.3 Classless Inter-Domain Routing	54
4.4 Routing tables	55
4.5 Example of a routing table	56
4.6 Default route.....	57
4.7 Classful and classless routing	57
4.8 IP classes	58
4.9 Routing protocol	59
4.10 Distance vector protocol.....	60
4.11 Link status protocol.....	60
4.12 Exterior Gateway Protocol	61
4.13 Dynamic Host Configuration Protocol.....	62
4.14 DHCP server	62
4.15 Functioning of the DHCP protocol	63
Practice questions.....	64
5 Transport layer.....	66
5.1 The transport layer	66

5.2 Gates and sockets	67
5.3 User Datagram Protocol.....	68
5.4 The package format	70
5.5 Example of UDP traffic	71
5.6 Transmission Control Protocol.....	72
5.7 Functions of TCP.....	72
5.8 Package format	73
5.9 Handshake	74
5.10 Window size	75
5.11 Example of TCP traffic	76
5.12 Internet Control Message Protocol.....	77
5.13 ICMP pdu format.....	78
5.14 Ping	79
Practice questions.....	80
6 E-mail, DNS and WWW	82
6.1 Domain Name System.....	82
6.2 Subdomains, domains and top-level domains	83
6.3 DNS servers	84
6.4 DNS queries and buffering	85
6.5 Resource Records.....	85
6.6 PDU format	86
6.7 DNS traffic.....	88
6.8 E-mail	89
6.9 Email protocol.....	90
6.10 Simple Mail Transfer Protocol.....	91
6.11 E-mail addresses	92
6.12 Sending e-mails (SMTP).....	92
6.13 Receiving mail (POP and IMAP).....	93
6.14 World Wide Web	94
6.15 Uniform Resource Locator	94
6.16 Hypertext	95
6.17 Hyper-Text Transfer Protocol.....	96
6.18 File Transfer Protocol.....	96
Practice questions.....	97

7 Network design.....	99
7.1 Topologies.....	99
7.2 Tier 1 topology	100
7.3 Loop	101
7.4 Ring	101
7.5 Mesh	102
7.6 Port-channels	103
7.7 Tier 2 topology	104
7.8 Access routers	105
7.9 Tier 3 topology	106
7.10 Quality of Service	107
7.11 Best effort	107
7.12 Classification	108
7.13 Marking	109
7.14 Agitating agents	110
Practice questions.....	112
8 Network security.....	114
8.1 Mac spam.....	114
8.2 Switch's handling of mac-spam.....	115
8.3 Protection against mac-spam	115
8.4 Mac spoofing.....	116
8.5 IP spoofing.....	116
8.6 Arp spoofing and IP sniffing	117
8.7 DHCP snooping and arp inspection.....	118
8.8 Denial of Service.....	119
8.9 DDoS.....	119
8.10 Protection against DDoS	120
8.11 Firewalls	121
8.12 Hardware firewalls and their functions.....	122
8.13 Zones.....	122
8.14 Access lists	123
8.15 Demilitarized zone	124
8.16 Firewall as gateway.....	125
8.17 Encryption	125

8.18 Symmetric encryption	126
8.19 Asymmetric encryption	126
8.20 Secure Socket Layer and certificates.....	127
8.21 SSH	127
8.22 Spam	128
Practice questions.....	128
9 Configuring network devices	131
9.1 Command line interface.....	131
9.2 Connection to the management interface.....	132
9.3 Prompts.....	132
9.4 Enable mode	133
9.5 sh ip int brief	133
9.6 sh run int	135
9.7 Configuration mode	136
9.8 Basic configuration of a router port.....	137
9.9 Password and login settings.....	139
9.10 sh ip route	140
9.11 Configuring a static route.....	141
9.12 Closure	142
Practice questions.....	142
Appendix A: Glossary	144
